PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building scalable SaaS products, and business productivity tools, and responsive web applications. Skilled in React, Next.js, TypeScript, Node.js, Laravel, PHP, and Supabase, with a focus on intuitive user experiences, secure backend systems, and translating business requirements into high-quality, production-ready software.

CORE TECHNOLOGIES

Frontend

CSS3 • HTML • Framer Motion • React • Next.js • TypeScript • TailwindCSS • JavaScript(ES6+) • Vue.js • Git • GitHub • Figma • AI-assisted Development •

Backend

Node.js • Express.js • PHP • Laravel • REST APIs • JWT Authentication • PostgreSQL • MySQL • Supabase • Firebase • Django • Python • Express.js

PROFESSIONAL EXPERIENCE

SYMBIO Product Engineer Oct 2020 - May 2025

- Developed and integrated 25+ RESTful API endpoints, powering authentication, data processing, and third-party integrations.
- Collaborated within a cross-functional team of 5 engineers and designers to deliver product releases on schedule.
- Contributed to weekly release cycles, delivering new features, bug fixes, and performance improvements.
- Improved application maintainability by building reusable components, optimizing frontend architecture, and implementing responsive, mobile-first interfaces.
- Deployed and maintained production applications, resolved critical issues, and continuously enhanced system reliability and user experience.

FEATURED PROJECTS

Pipsoul

Trading Journal Platform

Built a trading journal platform that enables forex and crypto traders to record trades, analyze performance, and gain actionable insights through a responsive analytics dashboard.

Tech Stack: Next.js • TypeScript • TailwindCSS • Supabase

Live: <https://pipsoul-dashboard-six.vercel.app/>

Github: <https://github.com/obaahshadrach/pipsoul-dashboard>

Programmers University

EdTech Platform

Designed and developed a full-stack educational platform for an African coding bootcamp, delivering a conversion-focused user experience from program discovery to application. Built secure authentication, product management APIs, and a responsive dashboard while ensuring scalability, performance, and a seamless onboarding experience for prospective students.

Tech Stack: React • TypeScript • TailwindCSS • Node.js

Live: <https://theprogrammersuniversity.com/>

Easyship

Logistics & Shipment

Designed and developed a modern logistics platform that streamlines shipment management for business and customers. Built responsive, conversion-focused interfaces with secure backend functionality, enabling users to manage deliveries, track shipments, explore logistics services, and interact seamlessly across devices. Focused on performance, scalability, and an intuitive user experience.

Tech Stack: React • Laravel • TailwindCSS • PHP

Live: <https://easyship.live/>

ADDITIONAL INFORMATION

I bring strong problem-solving skills, adaptability, and a commitment to delivering reliable solutions in fast-paced environments. I am available to resume at short notice and would be pleased to contribute if selected for the role.

EDUCATION

B.Sc. Industrial Chemistry

University of Benin • 2023
